

ORCA MOBILE

This is an easy way to make a whale mobile using:

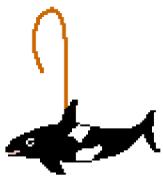

- paper and a printer
- scissors
- a stapler
- string
- markers or crayons
- 2 wire clothes hangers or stiff wire
- pliers and wire cutters.

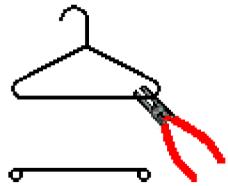

Print 4 orca print-outs.

- Color the orca.
- Cut out the orca.

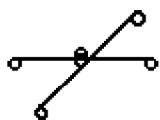

- Staple the front and back of orca together, leaving a small hole for the stuffing.
- Using wadded-up pieces of the leftover cut paper, slightly stuff the orca.
- Staple up the remaining hole in each orca.
- Staple a length of string about 1 foot (30 cm) long to the top of each orca. Vary the lengths a little bit.

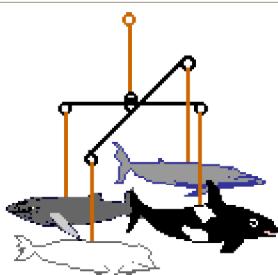

These steps are for an adult:

- Cut a length of wire from a clothes hanger about 1 foot (30 cm) long, using a wire cutter.
- Repeat, using the other clothes hanger.
- Using the pliers, make loops at the end of each piece of wire (these are to hang the whales on). Make sure that there are no sharp edges exposed on the wires.

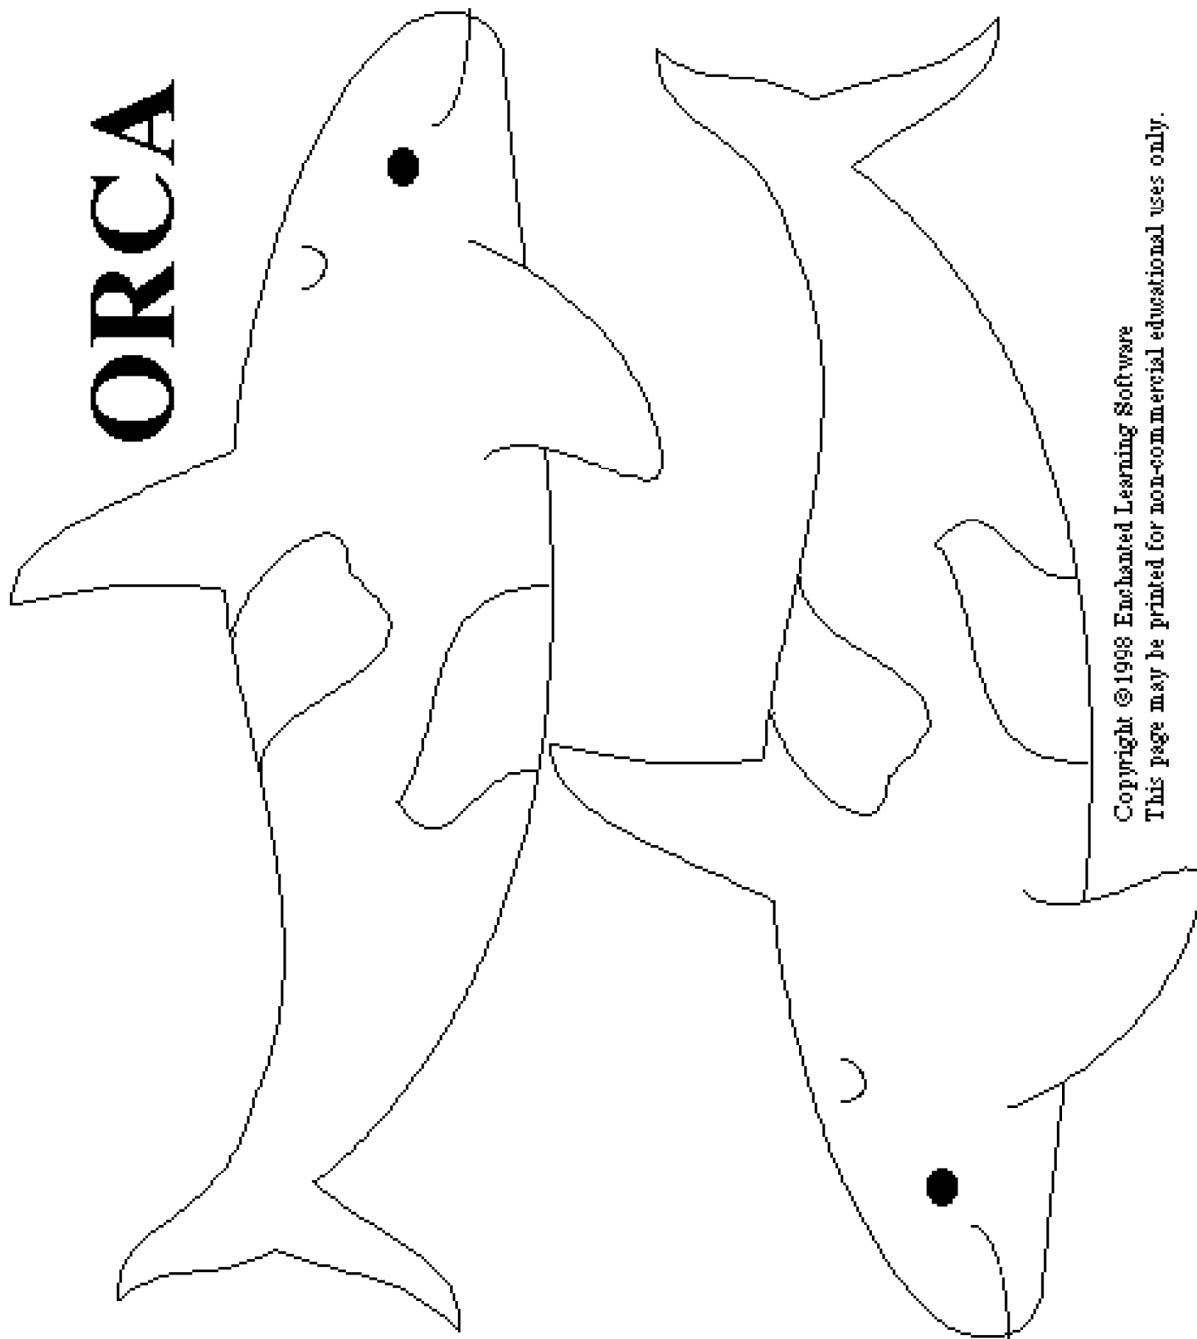

These steps are also for an adult:

- Using the pliers, make a loop in the center of one piece of wire.
- Thread the other piece of wire through the loop you just made.
- Bend this second wire downwards and twist, making a loop that intertwines with the center loop of the first wire.

- Attach an orca's string to each of the four outer loops.
- Attach a string to the top center loop - this is for hanging up your mobile.
