# Teaching Notes

Oceans Cutouts

The Oceans Cutouts are in proportion to one another and the mural. As a result, the larger animals will have to be pieced together from more than one sheet of paper and the smaller animals will have more than one on a sheet. There is a code in the lower left hand corner of each of the pages. The placement of the larger animals is shown below. After the animals have been cut out and colored, they can be placed on the wall mural.
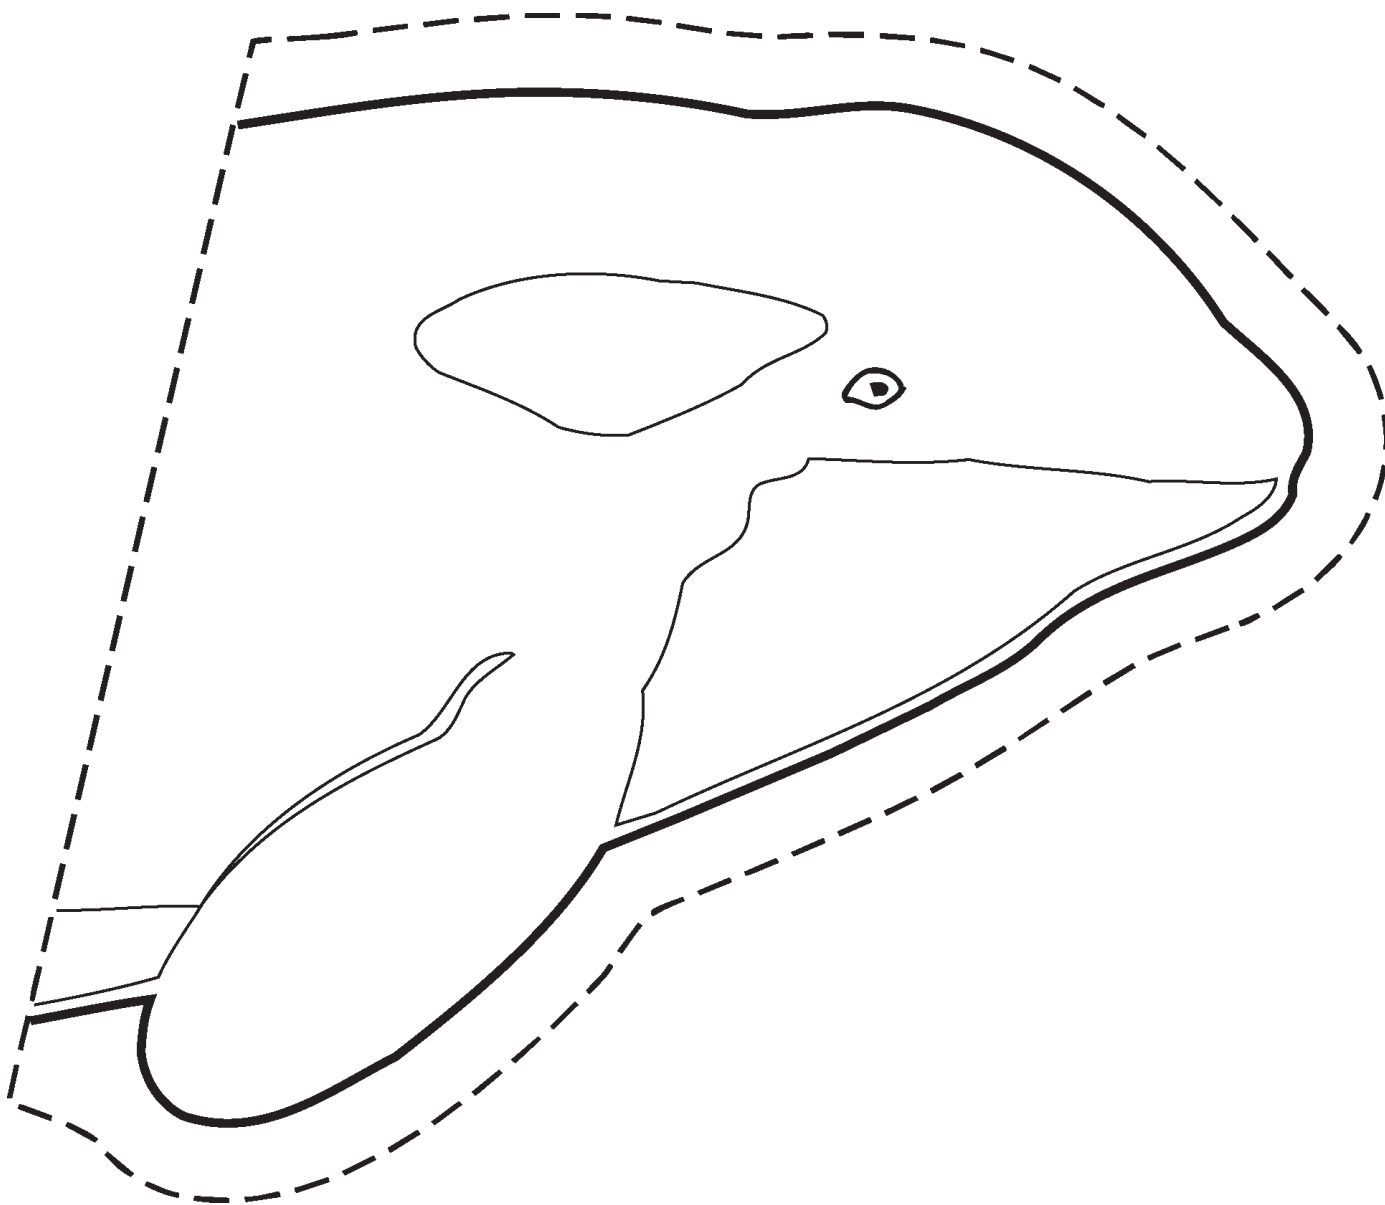

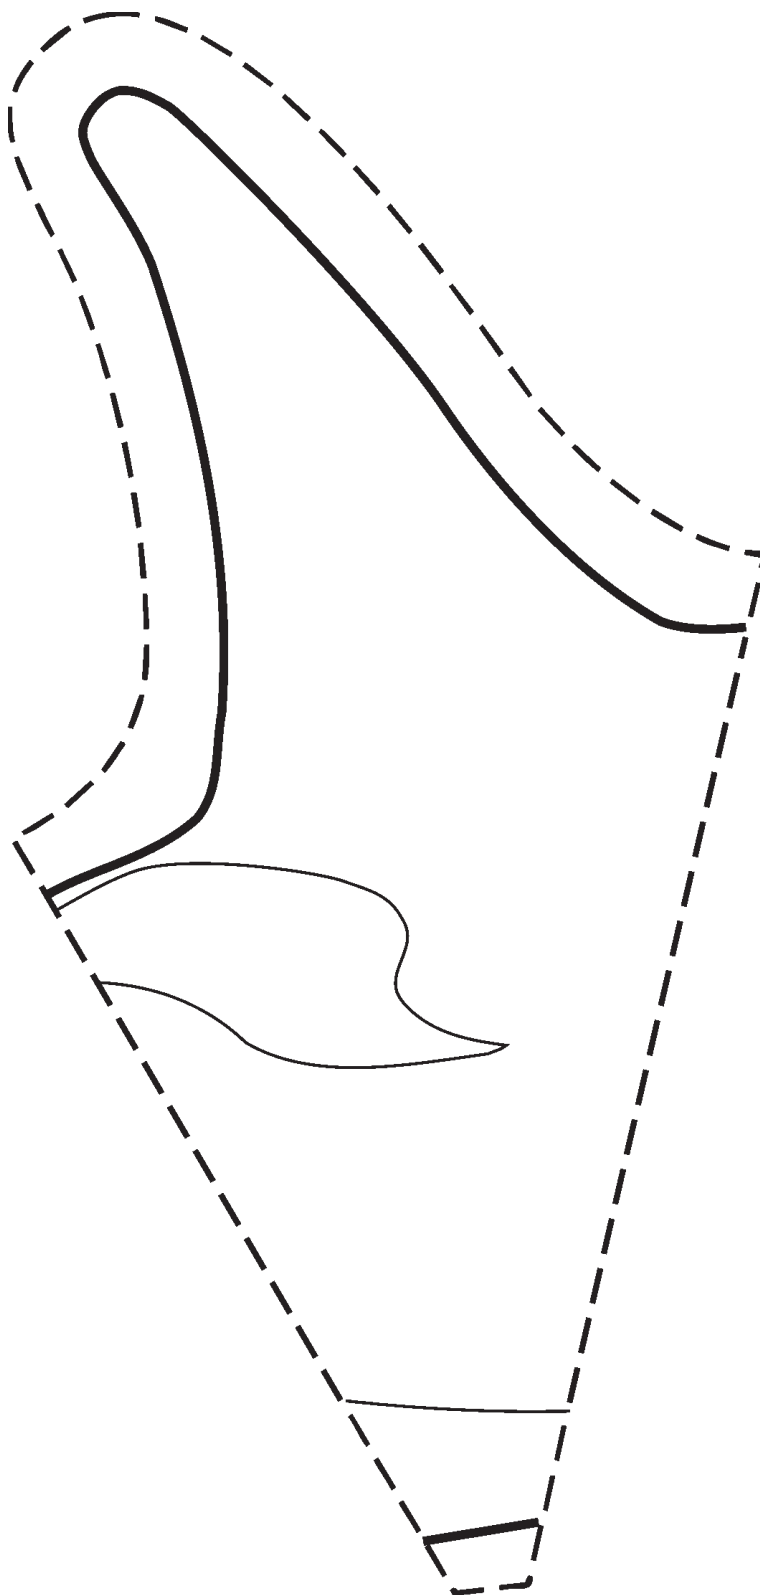

Killer Whale

# Killer Whale

Name _____

Killer Whale

Teaching Notes

Oceans Mural

Print out the 15 sheets which make up the mural. Each sheet has a code printed in the bottom left corner, which corresponds to those on the key below. Have your students color the sheets before cutting off the edges and taping together. Tape on the back of the sheets. To make a longer mural, you can print another set, which you can attach to the right side of the existing one. Once the mural is assembled and attached to the wall, students can place their cut out ocean animals on the mural.

For a longer mural, start again with the first column
